AI developer with 4+ years across **machine learning, data engineering and full-stack development**. At Siemens, builds production ML systems that automate payment-to-invoice matching for 3–5k payments a day, and leads the department's AI knowledge sharing and training. MSc in Computer Science specialised in Artificial Intelligence.

EXPERIENCE

Python & AI Developer · Siemens, Lisbon
Apr 2024 – Present

AI payment mapping
Built a machine learning system that combines a classifier with a retrieval model to map incoming payments to invoices. **Raised automated match coverage from 83–85% to about 88–90%** across 3–5k payments a day, reducing manual reconciliation work.
`Python · PyTorch · TensorFlow · Azure · SQL`

Pension investment insights application
Full-stack development of an application that gives insight into pension investments through interactive charts and data views, supporting investment decisions. Responsible for application security and management.
`Python · Django · REST APIs`

AI knowledge sharing and training
Founded a department initiative to share AI knowledge through talks and use-case showcases, and helped deliver AI trainings to colleagues. Key expert and main point of contact on AI in the department.

Data Engineer · KPMG, Lisbon
Sep 2022 – Mar 2024

Advisory, Technology Consulting. Built ETL pipelines and analytics workflows in Python and SQL for client data.

Researcher · LASIGE, FCUL
2021 – 2022

FCT research scholarship. Deep learning (MLP, CNN, LSTM) for predicting ALS disease progression; presented at the 7th LASIGE Workshop, 2022.

Sales Assistant · Worten
Sep 2018 – Oct 2019

EDUCATION

MSc Computer Science and Engineering, Artificial Intelligence · FCUL
2020 – 2022

Thesis: Deep Learning for Predicting Disease Progression of Clinical Endpoints in ALS. Final grade 16/20.

BSc Computer Science and Engineering · ULHT
2017 – 2020

PROJECTS

Diabetic retinopathy with CNNs
Image preprocessing and a CNN for binary and 0–4 grade classification. TensorFlow, Keras.

Asteroids with evolved networks
A genetic algorithm evolves neural networks that learn to play Asteroids.

Parallel temporal feature extraction
Parallel feature aggregation for fraud-detection data.

Multi-agent traffic simulation
Cars and traffic lights as autonomous agents. Python, Pygame.

SKILLS

AI AND MACHINE LEARNING
`Machine Learning` `Deep Learning` `LLMs` `Generative AI` `Classification` `Retrieval models` `PyTorch` `TensorFlow` `NumPy` `pandas`

PROGRAMMING
`Python` `SQL` `JavaScript` `Java`

WEB AND APIS
`Django` `REST APIs` `Back end` `Front end` `App security`

CLOUD AND DEVOPS
`Azure` `Docker` `Git` `CI/CD`

DATA
`Data Engineering` `ETL` `Data Pipelines` `Data Analysis`

CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900)

Cambridge Certificate in Advanced English · 2017

LANGUAGES

Portuguese · native

English · advanced (C1)

ACTIVITIES

Finalist, AIESEC Leadership Tournament · 2019

Volunteer team coordinator, Web Summit · 2019

Volunteer, greyhound rescue association

Motorcycle riding, travelling
